

## **ANNOUNCEMENT**

**Ministry for Innovation and Technology**

**State Secretariat for Transport Policy**

**Subject:** New road traffic regulations to be introduced on Highway 86, section between Mosonmagyaróvár and Csorna as of 1 March 2020

**Dear Road Users,**

**We would like to inform you that on the section between Mosonmagyaróvár and Csorna of Highway 86 in Hungary, the current total weight limit of 20 tons for the night (from 10:00 PM to 06:00 AM) will be extended to full 24 hours at the request of local residents.**

**Traffic changes will enter into force on 1 March 2020.**

Following the introduction of the new road traffic regulations, the lorries concerned will be able to travel on a safer, 2x2 lane route with higher service level between Mosonmagyaróvár and Csorna using M1 and M85 motorways instead of Highway 86. Moreover municipalities along the Highway 86 will be more liveable, more safety and the emission will be reduced in this area. The modifications will mean additional 18 kilometres along high-quality motorway network for freight traffic, without affecting municipalities.

Traffic changes will affect the TEN-T and the international E-road network as well. These modifications will be implemented in parallel with the diversion of transit freight traffic. M1 and M85 motorways on the sections concerned will be designated instead of Highway 86.
